Exhilaration is standard. Optima gives you two outstanding ways to enjoy its exceptional capabilities. A 2.4L Gasoline Direct Injection (GDI) I4 engine generates best-in-class⁴ standard 4-cylinder horsepower of 200 hp² and, on LX manual transmission models, class-leading² nonhybrid fuel efficiency of 24 city/35 hwy mpg³. For more performance, EX Turbo and SX models have a turbocharged 2.0L GDI I4 engine that delivers 274 horsepower and an impressive 22 city/34 hwy mpg³.

PERFORMANCE AND MPG

The Optima SX and EX Turbo's engine generates more power than VS Honda Accord or Nissan Altima,⁵ while delivering the fuel efficiency² of a 4-cylinder.

SMOOTH, PRECISE HANDLING

A four-wheel independent suspension featuring front MacPherson struts and a rear multi-link design with High-Performance Dampers delivers a remarkably smooth ride without sacrificing handling.

SPORTMATIC[®] TRANSMISSION¹

Available 6-speed automatic transmission provides smooth, virtually seamless shifting. Its Sportmatic design allows you to choose the automatic mode or, for a sportier driving experience, clutch-free manual shifting.

STYLE AND PERFORMANCE

The Optima SX has steering wheel-mounted paddle shifters for fingertip control of the Sportmatic transmission. It also has a sport-tuned suspension, 18-inch alloy wheels with black-colored front calipers, HID headlights, LED taillights and a lip spoiler.

EXCEPTIONAL FUEL EFFICIENCY³

A "smart alternator" electric Motor-Driven Power-Steering system and silica tires contribute to Optima's outstanding fuel economy.

ACTIVE ECO SYSTEM⁶

Automatic-transmission models have an Active Eco System. With a push of the ECO button, it adjusts the engine and transmission to optimize real-world fuel efficiency.

We've got you covered — from ABS to TCS. Safe driving begins with the ability to avoid certain accidents. That's why the all-new Optima is equipped with advanced active safety systems designed to help you maintain control, even in challenging road conditions and in some emergency situations. They function automatically, leaving you free to focus on the road.*

*Always wear your seat belt. ©2015 Kia Motors America, Inc. MSRP \$24,599 MS.

Prepare for the unexpected. Optima's safety systems are designed to help minimize injury when a traffic accident is unavoidable. The front seats feature active headrests and seat-belt pretensioners. Dual front airbags, front-seat-mounted side airbags and side curtain airbags are managed by an advanced sensor system.¹⁵ Optima wraps all of this — and you — in a protective, high-strength steel-reinforced body.

AIRBAG & SEAT-BELT SENSORS

This advanced system monitors the severity of an impact, the presence of a front passenger and seat-belt use, and then controls airbag inflation accordingly.¹⁶

FRONT ACTIVE HEADRESTS

In the event of certain rear collisions, the active headrests move forward, helping to reduce the likelihood of injury.

REINFORCED BODY

All doors are reinforced with steel beams to help absorb impact energy and deflect side-impact force. The A and B pillars are also reinforced to help strengthen the body of the vehicle.

FRONT SEAT-BELT PRETENSIONERS

Pretensioners have been designed to tighten the seat belts in the event of certain collisions. This helps to reduce the likelihood of injuries.

TIRE-PRESSURE MONITORING SYSTEM

This system includes air-pressure sensors located at each wheel. If a tire reaches a specified low air pressure, a warning light will alert you.¹⁷

LATCH SYSTEM

The standardized LATCH system (Lower Anchors and Tethers for Children) makes it easier to securely install a compatible child seat at the two ends of the rear seat.

The Power to Surprise.[®] For decades, Kia Motors has focused on building vehicles that reflect a commitment to quality, durability and product innovation. Today, we offer models to suit most every driving need. The value found in every Kia vehicle has been widely recognized, and Kia Motors has been one of the fastest-growing automotive brands in America for the past five years.¹¹

COMMITMENT TO AMERICA

Kia Motors has reached a special milestone: the opening of a brand-new \$1-billion state-of-the-art manufacturing facility in West Point, Georgia. At full capacity, the plant can produce up to 300,000 vehicles a year. Production of the new 2011 Sorento is currently under way there, making it Kia Motors' first vehicle to be built in the U.S.A.¹¹ The plant will generate more than just high-quality vehicles. Over 2,500 new jobs are expected to be created at the facility and up to 7,500 additional jobs in the surrounding area. It's all part of Kia Motors' commitment to America – a commitment that is sure to grow and strengthen in the years ahead.

¹¹Assembled in the United States from U.S. and globally sourced parts. 1, 14, 15, 16, 17, 18 See Specifications page for endnotes.

PRIDE OF QUALITY

Kia Motors designs and develops vehicles and rigorously puts them to the test at high-tech facilities and proving grounds worldwide. The result is a full line of vehicles with world-class quality.

SELLING STRONG

In 2010, Kia Motors sold its 5 millionth vehicle in the U.S.A., and it took less time to reach that milestone than Toyota.¹¹ In fact, Kia has recently outsold Lexus, Subaru, Volkswagen and Mazda.¹¹
